

THE FOCUS WILL BE ON YOU!

This is an opportunity to have Dawn Whitelaw, an instructor with over 50 years of teaching experience, to focus on your artistic growth by designing a program to improve one particular painting skill. For example, you could decide to work on design, color, brushwork, drawing, value pattern and key or another area that you are interested in improving. After an assessment and discussion, the skill to be worked on will be identified and a series of exercises will be assigned. After completion of exercises, and other homework assignments, skills learned will be applied to painting projects. A second assessment will lead to a personal plan to implement what you have learned.

Workshops are often designed to improve students' painting in a general way. This program focuses on one single skill. The idea for this program grew out of the success of the "Taking Your Work to the Next Level" workshop. The next level class focused on improving a single skill for three days with some on line follow up. This is an opportunity to receive this type of individualized focus and training for a period of six weeks.

" When I saw the growth students were making in the three day, "Taking your work to the next level" class, I realized how much more could be accomplished in a six weeks period of time" Dawn Whitelaw
